

## Michael J. Borden, New Assistant Professor

Dr. Michael J. Borden began as the department's newest Assistant Professor in July of 2017, specializing in structural mechanics. Dr. Borden graduated from BYU with a BS and MS degree in Civil and Environmental Engineering in 2002. He later went on to receive his MS and PhD degree in Computational and Applied Mathematics and Computational Science, Engineering and Mathematics from the University of Texas at Austin from 2009-2012. Prior to his work at BYU, Dr. Borden was an Assistant Professor for Civil, Construction, and Environmental Engineering at North Carolina State University.
